

## Introducing Bitcoin<sup>1</sup>.... change the way you **live, shop & explore!**

Bitcoin<sup>1</sup> is a new and exciting project that has been developed to be:

- **SUPER-FAST**
- **AFFORDABLE**
- **EASILY ACCESSIBLE**

The number of cryptocurrency holders is expected to increase nearly 10 times, from the **current 22 million to 200 million worldwide by 2020**. Capitalization of the cryptocurrency market is currently around **\$400 billion**. There is enormous demand to spend that wealth by buying real world products and services for crypto.

### What are the main differences between Bitcoin<sup>1</sup> and Bitcoin?

Both have **21 million total (maximum) supply** with Bitcoin being highly regarded as a store of value. However, historical transaction data analysis of the Bitcoin blockchain has provided indisputable proof of scaling (mass transactions) issues, high cost of individual transactions and time delays for settlement in many instances. This has rendered **Bitcoin non-viable as an everyday, any-purpose payment solution**, and it has shifted its purpose to primarily a store of value and accordingly been more commonly referred to as **“Digital Gold”** rather than a viable payment solution.

Comparison	Bitcoin <sup>1</sup> (BTC1)	Bitcoin (BTC)
Max. supply	21 Mil.	21 Mil.
Blocktime	15 sec	10 mins
Max. TX/day	6 Million	1.2 Million
Average TX fee	\$0.04	\$4.91
TX confirmations	88 sec	114 min
Price per coin/token (as at 28/04/18)	TBA (Pre-sale)	\$9,273
Current Market Cap	TBA	\$157.6 Billion
Established since	Mar 2018	Jan 2009

Bitcoin<sup>1</sup> overcomes these architecture restrictions by being sourced on the super-advanced Ethereum Blockchain network, with super-fast transaction times and astonishingly low transactional costs. Bitcoin<sup>1</sup> intends to compliment Bitcoin by being an alternative, every day, global payment solution, overcoming the transactional infrastructure limitations which prevented Bitcoin from reaching its full potential.

Bitcoin<sup>1</sup> will be a global mobile payment solution for buying and selling real world goods and/or services for cryptocurrency. A major push will begin in Q3, 2018 for mass adoption by global merchants and service providers to accept and send payments for goods and/or services using **BTC1** cryptocurrency via our in-house developed **Bitcoin<sup>1</sup> Mobile Wallet** and an income generating **Bitcoin<sup>1</sup> Merchant Platform**, and creation of a **Bitcoin<sup>1</sup> branded, worldwide ATM debit card**.

*Mobile Wallet*

*Merchant Platform*

*ATM Debit Card*

Bitcoin<sup>1</sup> is a logical and exciting next business effort with the vision to advance the mass consumer experience by delivering a **worldwide platform where goods and/or services can be paid using cryptocurrency**. Convenience and investment potential in one quality product.

The future development of BTC1 includes listing on the world's **major cryptocurrency exchanges to promote a transparent and fluid trading price**.

### **A grass roots opportunity**

Ultimately the mass adoption of Bitcoin<sup>1</sup> is expected to create significant demand for BTC1 and offer first round investors a grass roots opportunity in project and token growth, as well as to be part of a savvy, cosmopolitan global community.

**6,000,000 Bitcoin<sup>1</sup> tokens (BTC1) are being released via a crowdsale and will allow savvy investors the opportunity to purchase whole cryptocurrency for a fraction of the price of Bitcoin and own an exciting cryptocurrency with real potential of project and token growth.**

Visit <https://bitcoin1.global> for full details and how to participate in the upcoming BTC1 crowdsale.

**One world. One future. One Bitcoin.**
